ST. SAVIOUR'S, SOUTHWARK. — The *Morning Advertiser* says the resuscitation of the Borough-market, under the immediate superintendence of Mr. Rose, the architect, is proceeding rapidly. The iron columns and girders are being replaced, and when the covering of glass is laid on, and the clearances are effected in the immediate neighbourhood, the market will be far more unique, and almost as extensive as that of St. John, at Liverpool. It is not intended at present to cover over the vacant ground adjoining the collegiate church of St. Saviour, near to the Ladye Chapel; but it affords matter of much interesting consideration, and the historical recollections attached to the immediate spot (originally St. Mary Overs) is ripe with antiquarian matter.

WORKMEN'S TRUCK ANNIHILATION ASSOCIATION.—A large meeting of workmen connected with the various iron-works at Wolverhampton was held on Monday week, to adopt resolutions and re-organise an association established for putting an end to the system of truck, and chiefly composed of members not themselves subjected to the impost. The chair was taken by a working man, and the meeting was addressed by the Rev. Jno. Valler, of Prince's-end; Rev. — Willan, of Tipton, and others.

THE BRIDGEWATER GALLERY.—The pictures forming the Bridgewater Collection are now all arranged, and hung in the new mansion of the Earl of Ellesmere, in Cleveland-square, St. James's, and may be viewed by tickets. We shall take an opportunity to speak further of the gallery.

FOUL AIR IN WELLS. — Your correspondent X. Y. Z. desires information respecting "Foul Air in Wells," or rather its remedy. My experience leads me to recommend the following plan:—Lengths of tin tubing, attached by common "ears," or perforated plates, of the necessary length for the well, the top length having an union joint, to be attached to the bottom of a box or "barrel" 2 feet long by one foot wide: to the barrel fix a plunger, being a flat piece of wood, the edges covered with leather, and having four valves (opening downwards, of course): the plunger may be easily worked by one man; and if the tube be 2 inches in diameter, the supply of fresh air will be sufficient to enable a man to work in the well in a very short time.—E. C. A.

EXHIBITION OF PICTURES BY THE PAINTERS OF ALL NATIONS AT LICHFIELD-HOUSE, ST. JAMES'S-SQUARE.—The Directors of this novel gathering of pictorial art are actively preparing to open their exhibition. Among the foreign painters, whose works are already arrived, are Paul De la Roche, H. Scheffer, E. De la Croix, H. Lehmann, Rosa Bonheur, Goose, Thuilliere, E. Slingeneyer, H. Leys, Signol, Chauvin, E. Verboeckhoven, Willems Baron Gustaf Wappers, Geniisson, and many others. The saloons are intended to be opened for an evening exhibition, brilliantly lighted by gas, to afford the numerous classes of the community, who are occupied by their daily avocations, an opportunity of enjoying the view of these works of art, among which many of the finest works of the English school, we are told, will fully sustain the dignity of the national character in fine art.
